

UNIVERSITY OF SADAT CITY  
جامعة مدينة السادات

The interior regulation

## Faculty of Physical Education

### Introduction:

Due to the continuing scientific progress, the universities started updating their curriculum to keep pace with this scientific progress that is in line with the needs of the community in different disciplines in order to achieve close link among universities and society development.

In line with this philosophy, the Faculty of Physical Education at University of Sadat City is keen to develop its internal regulations, especially after a sufficient period has passed to the application of the current regulation by studying the needs of the community by specialists, and they found that there is an urgent need to introduce new specializations into the curriculum, especially in the areas of training, management, promotion and teaching.

A comparative study of the curriculum and regulations of the Faculty of Physical education in the developed countries has also been conducted, it shows that there is a need to introduce scientific amendments to curriculums, and adding new scientific subjects to support the knowledge of the students in line with international and scientific developments, accordingly, some amendments were made to the scientific sections to suit these new disciplines.

The study systems have been modified according to the two-semester system, which provide an opportunity for guiding students.

The Faculty hopes that these amendments will achieve the hopes and objectives regarding to scientific progress and positive interaction with the society's thinking, requirements, issues and problems of physical education in the Egyptian society.

## The first part

]Objectives - Scientific Departments - Scientific Degrees and Diplomas - Study System[
